MBARACHI VICTOR NDUDIM

SUMMARY

Senior Frontend Engineer with 7+ years of experience driving frontend architecture and influencing engineering standards across teams. Proven track record of leading frontend initiatives, improving developer experience, and building high-performance, user-centric applications in fintech and healthcare. Skilled in React, TypeScript, and modern frontend ecosystems, with a strong focus on system design, reusability, accessibility, and performance. Passionate about shaping frontend standards, mentoring engineers, and aligning engineering solutions with product and business goals.

SKILLS

Frontend Architecture & Systems: React, Vue, Angular, TypeScript, JavaScript, State Management (React Query, Redux).

Design Systems & UI Engineering: Component Libraries, Responsive Design, Accessibility (a11y), TailwindCSS.

Performance & Optimization: Code Splitting, Lazy Loading, Caching Strategies, Rendering Optimization.

Cloud & Platform Integration: AWS (S3, API Gateway, Amplify), Firebase, Vercel, CI/CD (GitHub Actions).

AI & Modern Tooling: OpenAI API, LangChain, AI Integrations, GitHub Copilot

Frontend Leadership & Architectural Impact

- Led frontend direction for AI-powered healthcare and fintech platforms, shaping architecture, performance, and developer workflows.
- Improved frontend performance and scalability through architectural decisions and optimization strategies.
- Mentored engineers and influenced frontend best practices within the team.
- Contributed to building reusable UI systems and improving developer experience.

EXPERIENCE

Rigo Inc (Health Tech & Fintech Solutions) — *Senior Front End Engineer*

September 2023 – Present

Frontend Architecture & Platform Leadership

- Led the design and evolution of scalable frontend architecture for AI-driven healthcare and fintech platforms, optimizing for maintainability, performance, and cross-team scalability.
- Established reusable component patterns and frontend standards that improved consistency and reduced duplication across features.
- Influenced frontend engineering decisions across multiple projects, aligning implementation patterns and architectural standards.
- Treated the frontend as a platform by promoting reusable architecture, shared tooling, and consistent development patterns across teams.

Design Systems & Developer Experience

- Translated Figma designs into reusable, accessible UI components, contributing to a scalable design system and improved developer velocity.
- Improved developer experience through better state management patterns, API integration strategies, and code organization.

Cross-functional Leadership

- Partnered with Product, Design, and Backend teams to define technical solutions aligned with user experience and business goals.
- Defined API contracts and integration strategies to ensure seamless communication between frontend and backend systems.

Performance, Scalability & Observability

- Drove performance optimizations using code splitting, lazy loading, and caching strategies, significantly improving application responsiveness.

- Implemented monitoring and debugging strategies to proactively identify and resolve production issues.

Mentorship & Engineering Excellence

- Mentored engineers, conducted code reviews, and enforced best practices across the frontend team.
- Contributed to CI/CD pipelines and engineering workflows to ensure reliable and efficient delivery.

MediSmarts Limited, Lagos — *Front End Engineer*

November 2019 - September 2023

- Contributed to the design and implementation of frontend architecture supporting scalable and maintainable UI systems.
- Built reusable component libraries and optimized application performance, improving responsiveness by up to 50%.
- Collaborated with cross-functional teams to align frontend implementations with product requirements and user experience goals.
- Led performance optimization initiatives, improving load times and application efficiency across multiple modules.
- Built cross-platforms mobile solutions using Capacitor and React frameworks.

PBG COMMUNICATIONS LTD, Lagos — *Front End Developer*

Oct 2018 - Nov 2019

Webpage Designing & Optimization

- Determined the structure and design of web pages based on user requirements and balanced functional & aesthetics designs.
- Created features to enhance the user experience while ensuring that the web design is optimized for smartphones
- Employed a variety of languages such as HTML and CSS to write & create user-friendly web pages .

Code & Website Improvement

- Built reusable code for future use and optimized web pages for 5 applications for maximum speed and scalability.
- Managed brand consistency throughout the designs and maintained & improved the company's website by adding more features and functionality.

Project Delivery & Graphic Designing

- Liaised with cross-functional teams to ensure that the client projects were completed on time and within a stipulated budget.
- Produced high-quality mockups & designed different prototypes and provided high-quality graphics & visual elements

EDUCATION

Michael Okpara University — *B.Sc. in Computer Science*

2011 – 2015, Abia State

Radiance High School, Lagos — *West African Senior School Certificate Examination*

2004 – 2010, Lagos State
